Stericycle Solid Waste Incineration Permit Issued

The Executive Secretary of the Solid and Hazardous Waste Control Board has approved a renewal of the solid waste incineration permit (#9102R2) held by Stericycle, Inc. to incinerate medical and related wastes. The permit renewal is effective February 15, 2006. Stericycle, Inc. (formerly BFI) petitioned the Executive Secretary of the Utah Solid and Hazardous Waste Control Board to renew Permit #9102 for the continued operation of the existing commercial medical waste incinerator. This facility is located at 90 North 1100 West, North Salt Lake, Utah. The public comment period notice for the DRAFT PERMIT (#9102R2) was published in the Davis County Clipper, the Deseret Morning News, and the Salt Lake Tribune.

Two public hearings for this permit renewal were held in order to receive comments from interested individuals. Oral and written comments received during the public comment period were reviewed and responses to the comments were prepared by the Division of Solid and Hazardous Waste. As a result of some of the comments, both the permit and permit application were amended.

Unofficial copies of the Permit, public notices, response to comments, and the permit application are available for public review on the Division Web page at: <http://www.hazardouswaste.utah.gov/swpermittedfacilities.htm>. Official copies of the permit, permit application, and response to comments can be viewed during normal business hours, or other times with prior arrangement, at the following location:

Division of Solid and Hazardous Waste
Cannon Health Building, 4th Floor
288 North 1460 West
Salt Lake City, UT

Questions should be directed to Roy Van Os at 801-538-6170.
